"The Island City"

AGENDA
City Council
Wednesday, December 27, 2017
7:00 PM

1. **Call to Order**
2. **Invocation**
3. **Pledge of Allegiance**
4. **Roll Call**
5. **Approval of Minutes/Summary** – 12/11/2017 Regular Meeting
6. **General Public Comments**
7. **County Commissioner Report / Presentations**
8. **Agenda Amendments**
9. **Mayor's Report**
10. **Recommendations and Reports:**

    A. DPW – Water Asset Management Plan
    Council will consider accepting the Water Asset Management Plan for submission to the Michigan Department of Environmental Quality.
    B. City-Wide Flower Purchase
    Council will consider approving the annual city-wide flower purchase for 2018 from Napp's Greenhouse in an amount not to exceed $4,500.
    C. Prince Street Signal Improvements
    Council will consider approving the bid from J Ranck Electric for $17,050 for improvements to the Prince Street Signal at M-89.
    D. Resolutions 18-01 through 18-05
    Council will consider adopting Resolutions 18-01 thru 18-05 for Ordinance Enforcement Officers, 2018 Council Meeting Dates, 2018 Employee Holiday Dates, 2018 Street Flag Dates and 2018 Street Closures.

11. **Communications:** The November 2017 Water Renewal Report, the November 2017 Public Safety Report, and the DRAFT 12/12/2017 DDA-TIFA-BRA Minutes.
12. **Accounts Payable - $347,598.69**
13. **Public Comments**
14. **Staff Comments**
15. **Council Comments**
16. **Adjournment**

Note: All public comment limited to two minutes, when recognized please rise and give your name and address

MINUTES
Plainwell City Council
December 11, 2017

1. Mayor Brooks called the regular meeting to order at 7:01 PM in City Hall Council Chambers.

2. Terry Steele gave the invocation.

3. Pledge of Allegiance was given by all present.

4. Roll Call: Present: Mayor Brooks, Mayor Pro-Tem Steele, Councilman Keeler, and Councilman Keeney. Absent: Councilman Overhuel.

5. Approval of Minutes/Summary:
A motion by Steele, seconded by Keeler, to accept and place on file the Council Minutes and Summary of the 11/27/2017 regular meeting. On voice vote, all voted in favor. Motion passed.

6. General Public Comments: None

7. County Commissioner Report: None.

8. Presentations: None.

9. Agenda Amendments: None

10. Mayor's Report: None.

11. Recommendations and Reports:

   A. City Manager Wilson introduced Karen Wieber, Senior RRC Planner with the Michigan Economic Development Corporation (MEDC) who thanked Erik Wilson and Denise Siegel for their work on the project of documenting policies and procedures as required by the MEDC for certification as a Redevelopment Ready Community (RRC). She gave an overview of the certification program and confirmed that the first of three steps was complete and that the actions taken by Council tonight would finish up the second step. She went over goals and best practice policies suggested by MEDC. She briefed Council on the Report of Findings that was prepared to outline where the city stands for completing all of the requirements for certification. She highlighted the city's Master Plan, website and Zoning Ordinance as great selling points. She noted the need for improvements to the capital improvements program, the site plan and economic development processes. She reminded Council that when funding is available, priority is given to communities with RRC certification. City Manager Wilson noted that this certification is integral when recruiting developers to work on projects in the city.
   A motion by Steele, seconded by Keeler, to adopt Resolution 17-22 authorizing implementation of recommendations necessary to receive RRC Certification. On a voice vote, all in favor. Motion passed.

   B. Clerk/Treasurer Kelley reported a resignation from the Parks & Trees Commission for a term that was set to expire in December 2017. Tom Belco submitted an application for appointment to the Commission.
   A motion by Keeney, seconded by Keeler, to confirm the Mayor's appointment of Tom Belco to the Parks & Trees Commssion for a two-year term. On a voice vote, all in favor. Motion passed.

   C. Director Bomar briefed Council on a budgeted purchase of a new police cruiser, which will also carry medical first responder equipment and supplies. The 2012 Tahoe will be repurposed..
   A motion by Keeler, seconded by Keeney, to approve the purchase of a 2018 Ford Utility Police Service Package vehicle from Signature Ford for $31,235.00. On a roll-call vote, all in favor. Motion Passed.

D. City Manager Wilson introduced Phil Doorlag from Wightman & Associates who reported on a change order based on the portion of the project already completed, resulting in a small decrease. He noted there would be another change order in the Spring of 2018 when the project is actually completed – that change order may result in an increase or decrease, but will be based on actual costs. The payment request is based on work actually performed to date.
A motion by Keeney, seconded by Keeler, to approve Change Order #1 for a decrease of $4,258.45 and Payment Request #1 to Kalin Construction for $120,465.13 for the North Prince Street Project. On a roll-call vote, all in favor. Motion Passed.

12. Communications:
    A. **A motion by Steele, seconded by Keeler, to accept and place on file the November 2017 Fund Balance and Investment Reports and the DRAFT 12/06/2017 Planning Commission Minutes. On a voice vote, all in favor. Motion passed.**

13. Accounts Payable:
    A motion by Keeler, seconded by Overhuel, that the bills be allowed and orders drawn in the amount of $93,050.02 for payment of same. On a roll call vote, all in favor. Motion passed.

14. Public Comments None.

15. Staff Comments

    Superintendent Pond briefed Council about ongoing evaluations of phone service options.

    Community Development Siegel confirmed ongoing work with the RRC certification project, and reported a successful Christmas Festival that included about 150 children with lots of activities and an overall positive day.

    Director Bomar reminded Council of the upcoming Shop With a Cop event on December 13 benefitting local area middle-schoolers.

    Clerk/Treasurer Kelley noted continued preparation for 2018 events.

    City Manager Wilson briefed Council on a budget concern about funding from the State for reimbursement of personal property. Due to a possible overpayment in 2016, the city may not receive the budgeted revenue in 2017. Staff is working with the State to determine the extent of the change.

16. Council Comments: None

17. Adjournment:
    A motion by Steele, seconded by Keeler, to adjourn the meeting at 7:36 PM. On voice vote, all voted in favor. Motion passed.

Minutes respectfully
Submitted by,
Brian Kelley
City Clerk/Treasurer

SUMMARY
Plainwell City Council
December 11, 2017

1. Mayor Brooks called the regular meeting to order at 7:01 PM in Council Chambers at City Hall.

2. Invocation given by Terry Steele.

3. Pledge of Allegiance was given by all present.

4. Roll Call: Present: Brooks, Steele, Keeler, and Keeney. Absent: Overhuel

5. Approved Minutes/Summary of the 11/272017 regular meeting.

6. Adopted Resolution 17-22 to authorize implementation of recommendations necessary to received Redevelopment Ready Community certifciation.

7. Confirmed an appointment to the Parks & Trees Commission.

8. Approved purchase of a 2018 Ford Utility Police Service Package vehicle from Signature Ford for $31,235.00.

9. Approved Change Order #1 for a decrease of $4,258.45 and Payment Request #1 to Kalin Construction for $120,465.13 for the North Prince Street Project.

10. Accepted and placed on file the November 2017 Fund Balance and Investment Reports and the DRAFT 12/06/2017 Planning Commission Minutes.

11. Approved Accounts Payable for $93,050.02.

12. Adjourned the meeting at 7:36 pm.

BOARD OF COMMISSIONERS MEETING – AGENDA

Thursday, December 14, 2017
Board Room – County Services Building

8:00AM DISCUSSION ITEMS:

Judge Buck and Peers ***(Listened to disagreements with employ wage study)***

9:00AM DISCUSSION ITEMS:

1. Board of Commissioners—Non-Motorized Blue Star Trail Ownership (160-764) ***(Tabled until January 1st meeting and asked administration to clarify the counties financial liability, Many people want trails and need the county to apply for grants, but our resources are limited and need more financial commitments from interested persons and or groups; passed 5-1 Jessup)***
2. Maintain Current Officers—Rules 2018 ***(; passed unanimously)***
3. Board of Commissioners—approve 2018 Meeting Dates (Board & Planning Sessions) ***(; passed unanimously)***
4. Local Law Enforcement Services ***(75% local contribution and 25% Allegan County since 1/15/15. Today costs 75% local=$74,257.37 and 25% Allegan County=$24,752.43. More municipalities have considered expanding contracting and we have to consider if we can afford?)***
5. Administrative Update ***(; passed unanimously)***
   a. Wellness Quarterly Report—Wellness Coordinator Amy Doeden ***(; passed unanimously)***
6. Probation/Parole Project—award bid/approve budget adjustment (163-682) ***(Continue with the project $598,726, to relocate probation officers within the Sheriff Complex); passed unanimously)***

1PM **CALL TO ORDER:**
OPENING PRAYER: Commissioner Tom Jessup
PLEDGE OF ALLEGIANCE:
APPROVAL OF MINUTES: Attached
November 9, 2017
PUBLIC PARTICIPATION:
Employee Recognitions—Deb Meade & Marilyn Wilson
Gun Lake Dam—Douglas Kelly, Clark Hill PC
INFORMATIONAL SESSION: Michigan State University Extension—Betty Blasé
ADMINISTRATIVE REPORTS:

CONSENT ITEMS:

1. Motion to approve of claims paid and to incorporate into proceedings of the Board (11/17/17 & 11/24/17 & 12/1/17 & 12/8/17 & 12/15/17) ***($295,906.05, $218,437.27, $319,269.98, $765,827.98, $506,919.03; passed unanimously)***

Mission Statement
"The Allegan County Board of Commissioners shall plan, develop, and evaluate the necessary policies and resources to ensure our county continues to progress and prosper"

ACTION ITEMS:

1. Gun Lake Dam—approve Special Assessment Roll (163-000) ***($270,700.00 total costs, Wayland Township assessed $460.19 for 2-years each beginning winter 2018 and Martin Township $ 351.91 ; passed unanimously)***
2. Board of Commissioners—amend 2017 Apportionment Report (163-819) ***(; passed unanimously)***
3. Board of Commissioners—approve Lakeshore Regional Entity Intergovernmental Contract (163-224) ***(Renew in compliance with the Mental Health Code; passed unanimously)***

DISCUSSION ITEMS:

1. Public Health—approve Environmental Health Field Service Fee Schedule (161-442) ***(Approve fee schedule and FTEs; passed unanimously)***
2. Public Health—approve Water & Sewer isolation distance change (163-640) ***(Change from 75' to 50' water and sewer regulations which is State of Michigan regulation. I was asked, can 2 or more properties share well or septic system? The answer is yes, The State allows; passed unanimously)***
3. Memorialize results into the minutes ***(To clarify disagreement with Judge Buck, his employee wages will begin January 1, 2018 based on The Wage Study Standards and County Standards; passed unanimously)***

PUBLIC PARTICIPATION:
ROUND TABLE:

- District-1-Dean Kapenga-***(Nothing)***
- District-2-Jim Storey-***(Nothing)***
- District-3-Max R. Thiele-***(Pleaser clarify disagreement with Judge Buck, this morning)***
- District-4-Mark DeYoung-***(Next week will get the next check from the casino and about 10% increase)***
- District-5-Tom Jessup-***(Nothing)***
- District-6-Gale Dugan-***(Nothing)***
- District-7-Don Black-***(Merry Christmas to you and yours. We have 3openings on the EDC; Recreation & Tourism, Arts & Culture, Non-Profit. I finished writing about my Dad, "Me and Dad", November 2017.***

District #7 Commissioner (616) 920-2875 Don Black Synopsis-December 14, 2017
(Comments in italics are my opinions and interpretation of the Commission meeting and actions)

How To Be Happy

"Lead the life that will make you kindly and friendly to everyone about you, and you will be surprised what a happy life you will lead."
- Charles M. Schwab

ADJOURNMENT: Next Meeting - TBD **@ BOARD ROOM – COUNTY SERVICES BUILDING, COUNTY SERVICES COMPLEX**.

CITY OF PLAINWELL

Water Asset Management Plan

Rick Updike

11/28/17

Prepared for the Michigan Department of Environmental Quality (MDEQ)

I. Contents

I. Introduction

The City of Plainwell, Department of Public Works is responsible for managing the infrastructure that pumps, treats, stores, and delivers potable water to nearly 4000 people. This Asset Management Plan (AMP) indexes and assesses water infrastructure, identifies shortcomings and plans for repairs and upgrades to the system. Also included in the plan is a financial plan for the utility. The major sections are as follows.

1. Asset Inventory: The documentation of water system assets. The inventory includes ratings for condition, possibility of failure and consequence of failure.

2. Criticality Assessment: The criticality assessment multiplies the possibility of failure rating times the consequence of failure rating to rank infrastructure for repair and replacement projects.

3. Levels of Service: A statement of current and desired level of service goals and methods used to develop these goals.

4. Capital Improvement Plan: A summary of the DPW water capital improvement plan (CIP) that identifies the water projects for the upcoming 5 year and 20 year periods.

5. Revenue/Rate Structure: A description of the rate methodology and funding strategies used to provide long term sustainability for the water utility and a safe and reliable supply of water to customers.

A. Mission Statement

The Plainwell Department of Public Works will operate the water system to enhance the value of the infrastructure, protect public health and provide the high quality customer service while minimizing long-term operating costs.

B. Asset Management Team

Asset management is an organization-wide responsibility. The asset management team is made up of the following: chief administrative staff, Department of Public Works operational staff,
City Treasurer and a consulting engineering firm.

Water System Asset Management Team

Name	**Title**	**Department**	**Role/Responsibility**
	Council person		Elected Official
Erik Wilson	City Manager	Administrative	Oversight
Rick Updike	Superintendent of Public works	Public Works	Operations/Technical
Brian Kelley	City treasurer	Administrative	Financial
Fleis and VandeBrink	Consulting Engineer		Outside Consultant

II. Asset Inventory

The intent of Plainwell's water asset management program is to catalog significant water assets, and determine their age, condition, useful life and replacement cost. Data produced from the inventory will be used for decision making on Operations and Maintenance (O&M) spending and capital projects.

A. Data Collection

A three-step process was used for data collection: defining the term asset, determining what assets are owned by Plainwell and where they are located and determining the condition, remaining useful life, and replacement cost of the assets.

1. Asset Definition

An asset is generally defined as "an item of value owned." For this AMP DPW defines an asset as tangible or intangible infrastructure owned by Plainwell associated with the producing, pumping, treating, storing, and delivering safe, potable water to the public.

Infrastructure with a value greater than $1,000 was recorded. Assets with values of less than $1,000 were consolidated with other assets under a combined value greater than $1,000 and managed as a single asset. Plainwell also combined some components with values greater than $1,000 if those components would be replaced or upgraded as part of a unit. Repairs to the unit would generally be funded by O&M while replacement would be a capital project.

2. Asset Information

Plainwell's asset indices include three wells, one 750,000 gallon water tower, water mains, valves, hydrants, service lines, meters and a Supervisory Control and Data Acquisition (SCADA) system which operates wells to control the water level in the water tower. Head pressure generated by the water tower level provides water pressure of, nominally, 62 psi. Throughout the distribution system.

a. Wells

Plainwell currently has 3 wells supplying groundwater to the storage and distribution systems. Wells #4 and #7 are located at a wellfield at 329 S. Sherwood Street and well #5 is located at 1163 W. Bridge Street. Well #4 was drilled in 1967, utilizes a 100 HP electric motor, has a 10" discharge and is controlled by a variable frequency drive that was installed in 2009. It has a rated capacity of 1500 Gallons per Minute (GPM). Well 5 was drilled in 1973, utilizes a 60 HP electric motor, has an 8" discharge and is controlled by a variable frequency drive that was installed in 2011. It has a rated capacity of 800 GPM. Well #7 was drilled in 1998, utilizes a 100 HP electric motor, has a 10" discharge and is controlled by a variable frequency drive that was installed in 2009. It has a rated capacity of 1500 GPM. Each well and its associated motor, drives and controls are considered a unit for the purposes of this AMP. The City performs water testing at the wells daily and performs any maintenance required at the wells when necessary. Peerless Midwest performs well

and motor inspections and maintenance yearly. They have been Plainwell's sole well maintenance contractor for over 15 years and recommend any large outlay maintenance needed at the wells. Only routine well maintenance has been recommended in the near future. The City also uses Fleis and VandenBrink engineering of Grand Rapids, MI as its primary civil engineer. Brian Rice, PE is currently investigating a site for a new well should it be needed in the foreseeable future.

Treatment at Plainwell wells consists of the addition of chlorine and fluoride via metering pumps. No component of the water treatment infrastructure meets the definition of an asset. Treatment components at each well will be considered a part of the well.

The useful life of wells is considered to be 50 years. Plainwell wells are inspected and tested yearly and cleaned and rebuilt as needed. The useful life of a specific well is subject to conditions. Well production efficiency over time is the primary indicator of the useful life at each well.

Table 1 – Well Asset Inventory is included in the Well Asset Criticality Table in the Attachments section.

b. Storage

Plainwell water storage consists of one 750,000 gallon elevated water tower built in 1999. Water towers in neighboring communities (Otsego Township and the City of Otsego) were designed to use the same water operating level as Plainwell and water interconnections between the systems were installed so neighboring systems can run on the water tower of the adjacent community. This redundancy was designed to provide temporary service between communities for tower maintenance work but would allow system solvency for a catastrophic failure of any one tower.

The tower was financed with a DWRF loan that will be finalized in 2019. Water tower debt service has limited additional capital projects since 2000 and the absence of that liability will allow much needed investment after the loan is paid off.

The useful life of a water tower may be 75 years, however, the condition of this high value asset is continually monitored and, with proper maintenance, the useful life may extend beyond what is predicted.

Table 2 – Tower Asset Inventory is included in the Tower Asset Criticality Table in the Attachments section.

c. Distribution

Plainwell's water distribution system is comprised of water mains, water services, hydrants, valves and associated fittings and components. Information on Plainwell's water distribution system was indexed and depicted on ESRI ArcGIS Geographic Information System (GIS) software in 2006. GIS allows lineal and point assets to be accurately mapped for visualizing the system. Data associated with these assets can be compiled and stored in tabular form in GIS. The data is linked to the city's Computerized Maintenance Management System (CMMS), Cartegraph where financial analysis can be performed. Assets information on items that are part of the water system but not suitable for indexing and depicting on GIS, including water services and meters are compiled on Cartegraph.

Cartegraph has modules for public works assets that are capable of indexing and valuing assets and computing depreciation. Beginning in 2008 DPW researched current values for selected assets, used a CIP table from the Bureau of Labor Statistics and worked backwards to determine what the value of each asset, installed, was when it was first put in. DPW did the computation for lineal asset according to parameters such as size and length and for point assets according to parameters such as size. Cartegraph did a depreciation computation on each individual unit which included size and length, amalgamated individual units and provided numbers for the amalgamated asset as a whole. DPW does not index water fittings such as tees, crosses, reducers, bends, etc. We assumed that fitting values equaled 5% of water main values. All numbers used for valuing assets were collected in 2008 and depreciation was applied for subsequent years.

Water main system segments are based on water main from valve to valve, loosely based on city blocks. For the purposes of this plan Plainwell assumes that valves and hydrants have the same expected lifespan, probability of failure and consequence of failure as the water main they are associated with.

The useful life of distribution componentry in Plainwell is approximately 75 years. The useful life of cast iron pipe in Plainwell may extend beyond 75 years. The Department experienced a reduction in water main breaks after installing Variable Frequency Drives at all wells allowing factors other than age to dictate water main replacement schedules.

Table 3 – Water Main Segment Inventory is included in the Water Main Asset Criticality Table in the Attachments section.

d. Meters

The City has three wells, each with its own meter for measuring source water pumped into the distribution system. The Plainwell DPW recently found the water meter at Well #4 to be inaccurate by close to thirty percent. The City has been working with its engineering firm to determine the best way to address the problem and plans to correct the errant meter in 2018.

Meters measuring water customer consumption in Plainwell's system employ two components; the meter itself and a reader accessible from outside the building. Plainwell changed from inside read meters to meters with an outside reader in the early 1990s. Since then meters have been changed out, primarily, when they fail. Periodically a list of meters with high numbers on their registers is generated and those meters are scheduled to be changed. In 2012 ten meters were pulled and sent to the manufacturer for accuracy testing. Eight meters were within specified accuracy, one was .8% outside specified accuracy and one did not register on low flow but was within specified accuracy at other flows.

Meters are read quarterly but billed monthly. Actual water meter readings are subjected to computations by billing software that produce estimates for the two months water meters are not read. On the month the water meters are read again another computation adjusts the bill to correct for estimating errors. There are several problems associated with Plainwell's policy of quarterly meter reading and monthly billing. If a water customer develops a leak in household plumbing early in the read cycle it can be 90 days before it is discovered. That scenario produces a high water bill for the customer and a public relations problem for the

City. Also, computations performed by the billing software Plainwell uses manipulate gallons metered to adjust bills. The manipulated meter readings can't be compared to actual water pumped to determine system water loss. Attempts to do just that have been tried in the past yielding confusing results.

Included in year 2019-2020 of Plainwell's twenty year Capital Improvement Plan is an Automatic Meter Reading system including all new residential and commercial meters. That system will allow monthly reading and billing based on actual meter consumption and will eliminate the problems detailed above.

In the past the useful life of water meters was considered to be approximately 20 years. New materials and designs introduced in the last 25 years have extended the accuracy of meters beyond what was previously expected. The cost of a system wide meter change out is substantial so loss of accuracy becomes a cost/benefit analysis. In Plainwell, however, the factors listed above make a system wide meter replacement program with new technology a priority.

Table 4- Water source meters, customer community meters and commercial meters over 1 ½" are included in the Water Meter Asset Criticality Table in the Attachments section. Residential and Commercial meters less than 2" are not considered capital assets.

e. SCADA

Plainwell employed a local controls contractor, Perceptive Controls of Plainwell, to build its current SCADA system in 2007. A new computer and a software upgrade were performed in 2015.

The SCADA system uses a FCC assigned radio frequency to transmit data for monitoring and controlling wells to provide sufficient water column height to attain 60-80 psi. water pressure at the customer's meter. The system commands well pumps, carries water column height data, well operation information and alarms operators if there is any number of failures in the system.

Plainwell installed a SCADA system in 1999 and replaced that system in 2007**.** In 2014 Plainwell replaced the computer that runs the system and installed updated software. The life expectancy of some of the other componentry of the present SCADA system seems unpredictable, however, the present SCADA system has been operating for 10 years and we believe it will still be in service for another 10 years.

Table 5-SCADA Asset Criticality Table

B. Asset Data Management and Maintenance

Asset data is managed by the Superintendent of Public Works and his staff using ArcGIS and Cartegraph software. Information Technology services are provided by Clark Technical Services.

III. Criticality Assessment

The criticality assessment performed on Plainwell's assets rated two risk factors; the probability of a failure (PoF) occurring and the consequences of the failure (CoF) if it were to occur. Plainwell used a 1-5 scale for PoF and CoF and these two key risk factors were multiplied as a means of measuring the criticality of each asset. PoF rating for wells was based on yearly testing by our maintenance contractor and time since last clean/rebuild. CoF for wells was based on production capability. PoF for storage was based on monitoring reports by Plainwell's tower engineering firm. CoF for storage was based on redundancy which exists on a temporary, not permanent basis. PoF for distribution was based on water main material, age and history of failure. CoF was based on location, interconnectivity and type of customer served. Again, water system segments are based on water main from valve to valve, loosely based on city blocks. For the purposes of this plan Plainwell assumes that valves and hydrants have the same expected lifespan, probability of failure and consequence of failure as the water main they are associated with.

$$\boldsymbol{Asset\ Criticallity} = \boldsymbol{CoF} \times \boldsymbol{PoF}$$

Criticality ratings are included in Asset Criticality Tables in the Attachments.

IV. Level of Service

	Regulatory	
		Meet all federal and state drinking water standards
		Meet all federal and state secondary standards related to aesthetics
CUSTOMER EXPECTATIONS	Quality	Monitor the source on a monthly basis; there shall be no E. coli detected in the source waters
		Investigate all customer complaints within 2 business days of reporting the complaint
		Continually update the asset inventory and conditions of the assets
		Continually update the Level of Service and keep consistent with customer expectations
	Reliability	Limit water system disruptions to less than 8 hours
		Maintain pressures between 45 and 80 psi
		Maintain average pressures ranging from 60 to 80 psi
		Work toward keeping unaccounted for water losses at less than 10%
		Provide fire flow for 100% of the customers within the City of Plainwell
		Maintain one day of storage at all times in the system
		Flush complete water system twice yearly
		Exercise all water main valves every three years
		Notify customers 48 hours prior to scheduled shutdowns
		Repair unplanned water main shutdowns and breaks within 24 hours
		Repair service line leaks within 72 hours
	Financial	Limit non-revenue water to less than 15%
		Maintain an average water bill to less than 2% of the City of Plainwell's median household income
		Review rates periodically and raise as needed to ensure full cost recovery and future planning
		Seek alternative funding avenues for capital improvement projects when necessary
		to minimize the costs to the City of Plainwell

Plainwell meets all regulatory, quality and reliability requirements. We are presently involved in several projects designed to determine the financial viability of its rate structure.

Plainwell has historically used a simple arithmetic method to compare water pumped to water sold; water pumped was divided by water sold to yield the percentage of unaccounted for water. That computation did not take into account any water that was known to be wasted in activities such as main breaks, flushing, hydrant testing, fire-fighting or hose testing.

The City of Plainwell uses Peerless Midwest for testing and inspection services and any maintenance on its water wells. In 2014 DPW questioned the validity of the accuracy claimed for source water meters at city wells four and five. It was determined that the method of testing well meter accuracy was faulty and an

alternate method was developed which showed the well four meter to be measuring approximately 73% of the water being pumped through it. The city is currently working with its engineering firm on a project to restore accuracy to the well four source meter.

DPW also suspects that a computation done by the city's water billing software may be responsible for additional inaccuracies in data necessary for determining unaccounted for water. DPW is working with water billing which is performed by City Administration, not DPW, to generate a report comparing water pumped and metered at city wells to water metered at city customer locations. That data would accurately describe unaccounted for water. A previous attempt to generate such a report compared water pumped and metered at city wells with data from a report generated by BS&A water utility billing software. The data used on that report came from a column labeled billed usage. Data in the billed usage column is not water metered at customer locations. The data is manipulated by the water billing software for the following reasons;

Because meter reading is labor intensive the city bills for water monthly but only reads water meters quarterly. There are two months each quarter where water billed is based on estimated usage. To produce the estimate, the software averages water usage over the quarter in the year previous to the read cycle under consideration, and uses that average for both estimated months. Every time meters are read, actual meter readings are subjected a calculation to adjust for over or under estimating in the previous two months. That is the data in the billed usage column on the BS&A produced report and it does not produce a valuable comparison between water metered at the wells and water metered at the customers meter.

The City uses meter reading equipment and software produced by Sensus Meters to meter and read customer water meters. Meter readings directly from the reader, with no calculations performed, are available and that data is what is needed to be compared with water pumped and metered at city wells. Such a report would only be available quarterly, after each read cycle.

DPW is working with Plainwell City Hall Administration to collect quarterly meter data either directly from the Sensus meter reading equipment or from BS&A software, prior to any adjustments performed to correct over or under estimating on the estimated billing months. In a test using un-manipulated reads provided by City Hall Administration DPW found:

- Some accounts disappear for a period of time. Those accounts are considered "inactive". That causes a misalignment in rows that must be adjusted manually after each read if the city wants to monitor unaccounted for water over time. It remains to be seen if a report can be formatted in a way that wouldn't cause row misalignment over time or if a report can be developed to compare unaccounted for water over time.
- Account numbers in Plainwell's system are not discrete. If a customer has a sprinkling meter, for instance, both meters will have the same account number and, obviously, the meter reading will be different.
- In instances where the same account number is assigned to more than one meter the readings may be juxtaposed from one quarter to the next, according to which meter was read first.
- The first 10 numbers of the account specify a location or customer but the last two numbers may be different. This may be because the house is a rental and one number, 01 for example, may be used when the landlord pays the bill. Subsequent numbers may be for a particular renter. If a renter moves out and another moves in the new renter gets another number. That is why some of the last

two account numbers may be as high as 12. Data must be sorted to be analyzed over time and sorting also causes row misalignment from quarter to quarter.

- Data from the Sensus water meter reading equipment is downloaded to the BS&A water utility billing software when the reads have been collected by water department employees. At that time the city billing clerk runs a report that should indicate unaccounted for water. An exception report is also run to find any problem with the reads that might affect billing. After that report is run the billing clerk directs a water department employee to re-read any meter on the exception report. The billing clerk should wait until all work generated by the exception report is complete and all meters have been properly read before running the unaccounted for water report to capture all metered usage. That is not a priority for billing and is not being done as of this date.

DPW analyzed the data and realigned rows to get the proper reading in the proper rows so calculations could be done. DPW made adjustments to align accounts where the first 10 numbers were the same but the last two numbers were different.

DPW corrected juxtaposed numbers on accounts with the same number. DPW then entered formulas to analyze the data. The test data seemed reasonable at 9.52% for 2015 Q2 and 7.32% for 2015 Q3. DPW has not been successful in getting a report designed by BS&A, the water billing software provider, using the data outlined above. DPW believes that the unadjusted water meter data from the Sensus water meter reading equipment is the proper data to use in the unaccounted for water report the city seeks. The BS&A water billing database contains water meter numbers as well as water account numbers. Water meter numbers are discrete so associating water meter readings with water meter numbers as opposed to water accounts would eliminate more of the problems described in the bullet points above. Finally, waiting until all meter reading data is collected and entered before running the unaccounted for water report would produce the most accurate report and that procedure should be followed.

DPW is working with City Administration to define parameters and contract BS&A to produce a report using the inputs above. Since both water and sewer revenues are generated from water meter readings there is also value in depicting the difference, if any, between water metered at the customer's tap and water and sewer billed. There should be little variation in graphed data showing water meter reads and water and sewer bills. A check on computations used to produce bills from reads must be accomplished to assure a valid rate structure. As mentioned in Part 2c of the Asset Inventory section, the City plans to replace residential and commercial water meters in the 2019-2020 budget year with an AMR system and go to monthly reading and billing which will eliminate problems associated with quarterly meter reading.

Plainwell maintains databases of all water testing required by MDEQ, water billing, all water main and service breaks, fire hydrant testing, unaccounted for water related to system activities, valve exercising and other activities. The Department is working on a report detailing unaccounted for water and considering a rate study.

V. Capital Improvement Plan

The City of Plainwell Capital Improvement Plan (CIP) for water was developed as required by the Michigan Department of Environmental Quality (MDEQ). The plan is also included in the City's comprehensive 6 year CIP document.

The water CIP was developed to accommodate street construction, improve system hydraulics and firefighting capabilities, retire undersized water mains, and to eliminate obsolete water main materials. Additionally, substantial investments are planned to improve water metering, maintain the water tower, and to upgrade the Supervisory Control and Data Acquisition (SCADA) system and well infrastructure.

The CIP incorporates major projects suggested in the 2014 City of Plainwell Water Reliability Study performed by Fleiss and VandenBrink Engineering. Project priority was adjusted where necessary to insure that the water fund balance remained healthy.

All cost figures mentioned in the packet are in 2014 dollars.

Notable items in the CIP include bonding in 2019-2020 budget year for about $1,100,000. That money would allow the City to paint the interior of the water tower tank, relay water main on Sherwood Street from Oak to Main Street and purchase a radio read metering system. The tank painting is a big ticket item that occurs on at 15-18 year basis. The water main on Sherwood is one of the worst in the City in terms of water main breaks and this project would allow another bad section of water main on Main Street between Sherwood and First Avenue to be abandoned. The Sherwood Street Project uses Federal Small Urban funding to help pay for reconstruction of street, sidewalks, curb and gutter. Water work is scheduled to be completed prior to the paving work. The City last had a major water meter replacement project almost 25 years ago and replacing all City meters with radio read technology would allow all meters to be read monthly. That would eliminate estimated bills and enhance the accuracy of the meters which should increase revenues.

The CIP is a planning tool that is intended to guide the Department of Public Works in future budget cycles. Spending for the listed projects will be submitted for approval by Council yearly. Spending remains under the jurisdiction of Council, however, the water CIP was adopted by Council as a planning document in 2016.

The CIP was developed to allow normal utility operations, provide system improvements and maintain a healthy balance in water funds. City Treasurer Brian Kelly stated "I believe (any plan to close a funding gap between CIP costs and revenues) is not applicable as the city has no funding gap in general operations in the Water Fund and uses the Fund's reserves, as needed, to fund any major capital outlay.

Capital Improvement Plan Project Details are included in the Attachments.

VI. Revenue/Rate Structure

Required documents describing the City of Plainwell water operating budget, revenue, rate structure and legal authority for setting rates are included in Attachments. The City will retire a DWRF bond in its 2019-2020 fiscal year and is scheduled to seek DWRF financing that year to fund future projects as described in the Capital Improvement Plan section. Since the terms of that bond are unknown at this time there is some question as to how the new bond will affect the CIP going forward. When the terms of the loan are known and the source and, perhaps, customer metering issues described in the Level of Service section are resolved the City will perform a rate study to be sure rates fund operating and planned capital expenditures in the future.

Water operating budget, revenue, rate and legal authority documents are included in the Attachments.

Capital Improvement Plan Project Details

2017-2018

Extend 8" water main into former Plainwell Paper property, from Allegan Street near Prince Street, for future development. CIP=$54,600

2018-2019

Connect to an existing 12" water main stubbed from Allegan Street into GHD property at the former east drive into the former Plainwell Paper Property. Extend this 12" 200' north to provide water to the greater Plainwell Paper property in the future. Also, extend an 8" water line to GHD to provide a new service to GHD/ City Hall. This project is also necessary to eliminate old water infrastructure in Pell Park in the future. CIP=$50,000

2019-2020

Bond for $1,100,000 to provide funding for interior water tank painting ($238,874), relaying a 12" water main on Sherwood Street between the 12" main at Oak Street and the 12" main at Main Street ($208,000), and the purchase and installation of a radio water meter reading system ($550,000). Perform this work when scheduling allows. CIP=$1,100,000

2020-2021

Connect to the 12" water main on at the south end of the N. Main Street Bridge over the Kalamazoo River and extend the 12" south 360' to Bannister Street and then 140' west to connect to a 10" main near the Kalamazoo River Mill Race. This project will improve system hydraulics and eliminate old water mains in Pell Park that were installed when the City's water plant was on the property. An 8" water main under the Mill Race can also be abandoned. CIP=$75,000

2021-2022

Water tower tank exterior cleaning. CIP =$6,400

2022-2023

Rebuild 3 Variable Frequency Drives at City source water wells for $5000 each. CIP=$15,000

2023-2024

No work is scheduled this budget cycle.

2024-2025

Extend 8” water main from Florence Street to the Industrial Parkway 10” water main. Project will loop water at the Industrial Park and provide another path for water to flow from the water tower. At present, any disruption in water flow north of 320 Acorn Street isolates the water tower and requires either opening a bypass and feeding water from Otsego Township or running a well with a pressure reducing device wasting water. This project will require right-of-way acquisition in Gun Plain Township. CIP=$347,600

2025-2026

No work is scheduled this budget cycle.

2026-2027

No work is scheduled this budget cycle.

2027-2028

Water tower tank exterior cleaning. CIP=$6,400

2028-2029

Two year project to relay all existing 4" water main with 8" CIP=$117,400

2029-2030

Paint exterior of water tower tank. CIP=$90,000

2030-2031

No work is scheduled this budget cycle.

2031-2032

Upgrade 750' of 8" on Acorn to 12". This project will provide a path using large water main from the primary water wells to the water tower. CIP =$90,000

2032-2033

Water tower tank exterior cleaning. CIP=$6,400

2033-2034

No work is scheduled this budget cycle.

2034-2035

Paint interior of water tower tank. CIP=$240,000

2035-2036

Replace 4" main on N. Main Street. CIP=$55,000

2036-2037

Replace asbestos concrete pipe on N. Sunset Street. CIP=$75,000

Resolution 11-16
City of Plainwell
Allegan County, Michigan

A RESOLUTION APPROVING AN INCREASE IN WATER AND WASTEWATER FEES AS PRESENTED:

WHEREAS, the City of Plainwell is desirous of updating various water and wastewater fees to reasonably reflect the city's cost to provide these services to the citizens of the City and Customer Communities

WHEREAS, with an analysis of the City's water and wastewater utility User Charge System that funds both the commodity (day to day expenditures) and the Readiness-to-Serve (capital expenditures) needs; and

THEREFORE, the City adopts the wastewater rates as follows:

User Charge - O&M Commodity:	$4.20 per thousand gallons
User Charge – Industrial Pretreatment Program (IPP):	$0.19 per thousand gallons
Readiness-to-Serve Capital Charge:	$1.50 per thousand gallons

THEREFORE, the City adopts the water rates as follows:

User Charge – O&M Commodity:		$1.88 per thousand gallons
Ready to serve charge	Meter size	
	¾"	$6.64
	1"	$11.96
	1 ½"	$13.29
	2"	$17.94
	3"	$24.59
	4"	$33.22

The rate increase will become effective July 1, 2011 to be included in the August 1, 2011 billing.

FURTHERMORE, the City hereby adopts the practice of annual fee adjustments for Wastewater reflecting inflation by the Consumer Price Index for All Urban Consumers (CPI-U) category Water, Sewer and Trash as published by the U.S. Bureau of Labor Statistics. The City shall adjust the User Charge System to reflect increases in the CPI, with the exception of any fixed debt service component; and

FURTHERMORE, the City hereby adopts the practice of fee adjustments for Water at a rate of 3% for the fiscal years 2011/2012 and 2012/2013. Subsequent annual fee adjustments for water will reflect inflation by the Consumer Price Index for All Urban Consumers (CPI-U) category Water, Sewer and Trash as published by the U.S. Bureau of Labor Statistics. The City shall adjust the User Charge System to reflect increases in the CPI, with the exception of any fixed debt servicecomponent.

Resolution Declared Adopted: June 27, 2011

RE: CITY OF PLAINWELL – PRINCE STREET SIGNAL IMPROVEMENTS
BID TABULATION AND RECOMMENDATION FOR AWARD

Dear Mr. Wilson:

I have reviewed and tabulated the bids received for the above referenced project and have found J. Ranck Electric, Inc. to be the low, responsive bidder in the amount of $17,050.00. I recommend the City award the Construction Contract for this project to J. Ranck Electric, Inc. in said amount at the next regularly scheduled City Council meeting on Wendesday, December 27, 2017. I have enclosed a copy of the bid tabulation for your use.

If you have any questions please feel free to contact me.

Very truly yours,

WIGHTMAN & ASSOCIATES, INC.

RESOLUTION

18-05

To be used by Governmental Units in connection with Applications to Construct, Operate, Use and/or Maintain Within the Right-Of-Way; or to Close a State Trunk Line

RESOLVED, that the **Director of Public Safety** is hereby authorized to make application to the Michigan Department of State Highways & Transportation on behalf of the **City of Plainwell** in the county of Allegan, Michigan for the necessary permit(s) to allow for any parade or other event that would require the **closing of State Highway M-89** for the calendar year 2018 January 1, 2018 to December 31, 2018 within the right-of-way of State Trunk Line M-89, and that the **City of Plainwell** in the county of Allegan, Michigan, will faithfully fulfill all permit requirements, and will indemnify and save harmless all persons from claims of every kind arising out of operations authorized by such permit(s) as is (are) issued.

I HEREBY CERTIFY that the foregoing is a true copy of a resolution adopted by the **Plainwell City Council** of the **City of Plainwell** at a Regular meeting held on the 27th day of December A.D. 2017

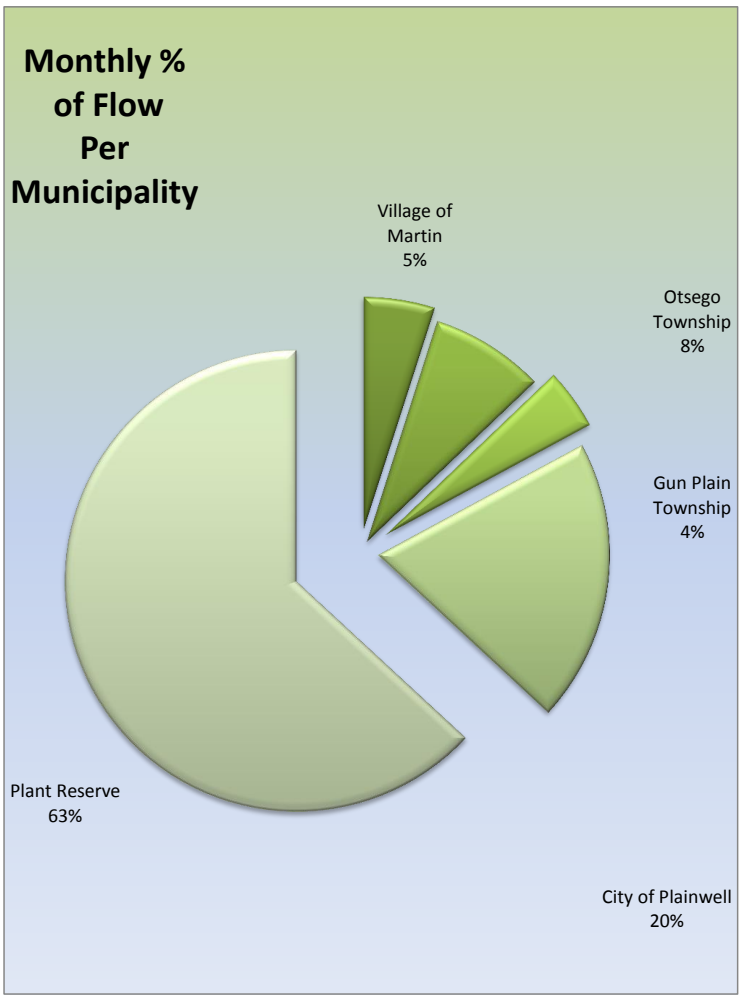
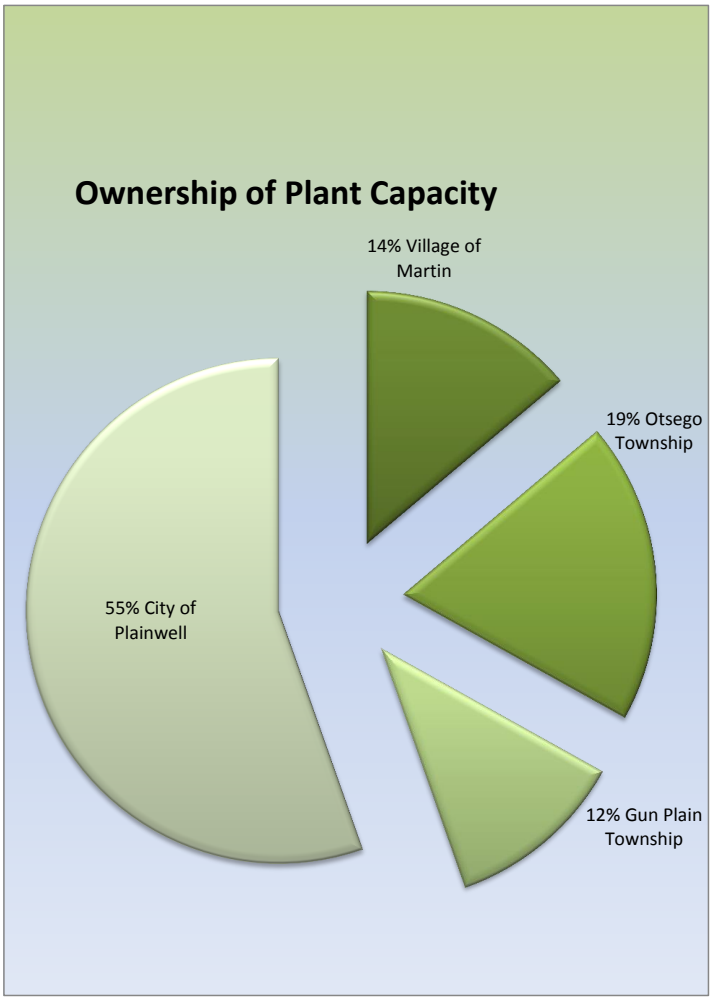
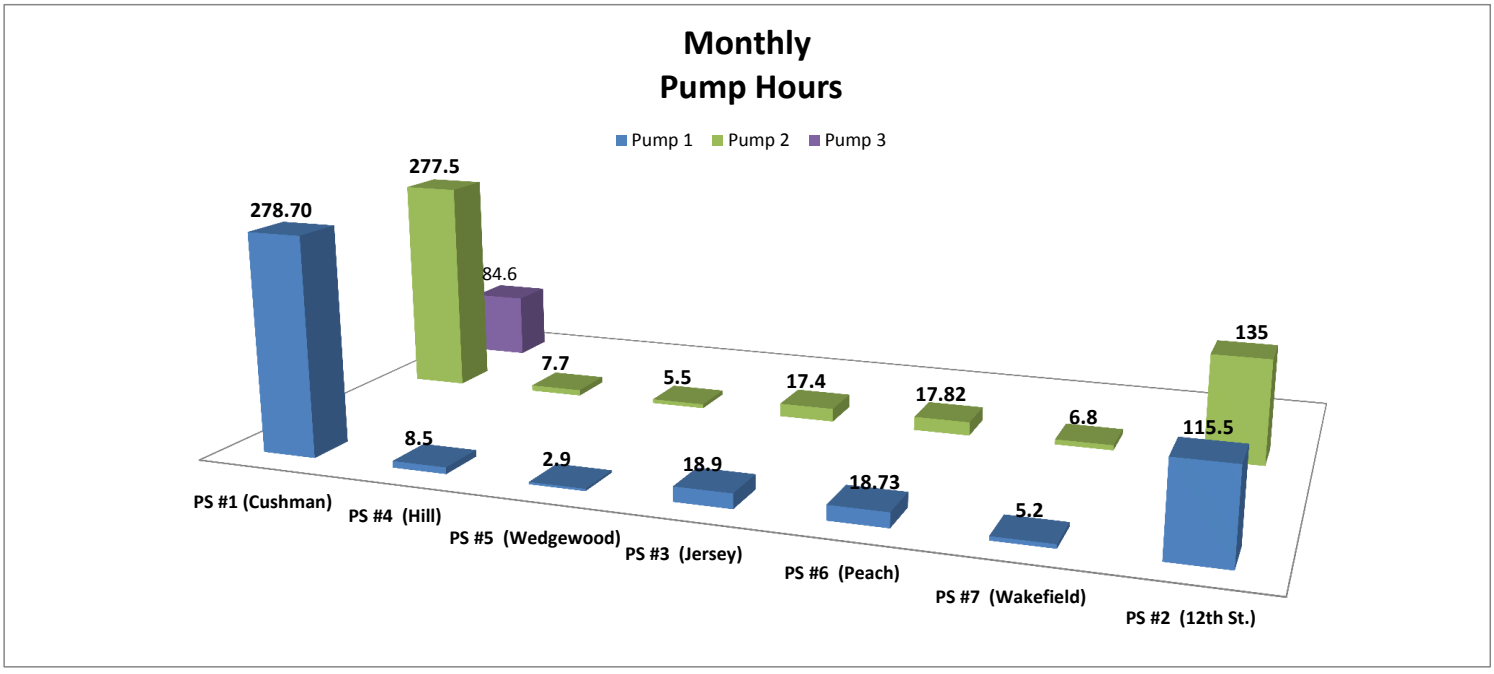
Avg. Daily Plant Flow from entire service district	0			





State Required Reporting Compatible Pollutants

	MI State Requirement	City Benchmark	Monthly Avg. Reported/MDEQ
Carbonaceous Biochemical oxygen demand (CBOD-5):	25 mg/l	15	5.86
This test measures the amount of oxygen consumed by bacteria during the decomposition of organic materials. Organic materials from wastewater treatment facility act as a food source for bacteria.			
TOTAL SUSPENDED SOLIDS (TSS):	30 mg/l	15	8
Includes all particles suspended in water which will not pass through a filter. As levels of TSS increase, a water body begins to lose its ability to support a diversity of aquatic life.			
PHOSPHORUS (P):	1.0 mg/l	0.45	0.23
Controlling phosphorous discharges is a key factor in preventing eutrophication of surface waters. Eutrophication is caused by water enrichment of inorganic plant nutrients. Eutrophication negatively effects water bodies due to increases in algal blooming, causing excessive plant growth which depletes dissolved oxygen in the river which is necessary for aquatic life to survive.			
Total Coliform (COLI):	200counts/ml	50	5
A group of bacteria found in soil, on vegetation and in large numbers in the intestine of warm-blooded animals, including humans. Water is not a natural medium for coliform organisms and their presence in water is indicative of some type of contamination.			



Pumps convey the waste where gravity sewers cannot, run times are a indicator of how the station is operating and being maintained.

Plainwell Department of Public Safety

November 2017 Monthly Report

Submitted By: Director Bill Bomar

November 2017 Report Summary

Training:

On November 1, 2017, the Public Safety Department, as a whole, received new radio and pager training. We also received training on cancer awareness.

The police reviewed General Order #32 relating to bomb threats and suspicious packages. The police officers also trained with their firearms. It was time for a cold-weather and night-time shoot.

On November 15-16, the police trained on and reviewed General Order #21, Operations Beyond The City Limits. The training was scenario based.

We also trained the officers in the use of new Dailey Activity Sheets that Officer Chapman developed. At 6:00 p.m., the department came together and we trained on scene size up. The training was a power point program and a tabletop exercise.

Foot Patrol

The officers performed 5 hours of foot patrol and had 102 citizen contacts in the month on November.

PLAINWELL PUBLIC SAFETY

Police, Fire and Medical First Responder Services

MONTHLY REPORT
November 2017

Prepared by Director Bill G. Bomar

Plainwell Department of Public Safety

Scheduled Hours By Activity for November 2017

The categories listed below are based on law enforcement related activities and the hours that scheduled road patrol personnel spend in the 4 major areas.

	Total Hours	Percentage of Total Hours
TOTAL ROAD PATROL HOURS SCHEDULED FOR THE MONTH	**761**	
The Hours officers are scheduled for road patrol or other uniformed functions. These are fixed shifts which generally carry assigned duties.		
Totals of all the below mentioned areas.		
HOURS SPENT INVESTIGATING OR HANDLING CRIMINAL COMPLAINTS	**45**	**5.95%**
The Hours Scheduled for criminal investigations of complaints that are in violation of a criminal law that an individual could be arrested and jailed for.		
Examples include: Burglaries, Robberies, Drunk Driving, All Sex Offenses, Alcohol Offenses, Larcenies, Etc.		
HOURS SPENT INVESTIGATING OR HANDLING NON-CRIMINAL COMPLAINTS	**70**	**9.23%**
The Hours Scheduled for Calls for Service or Complaints that require investigation but are not criminal in nature.		
Examples include: Auto Accidents, Accidental Fires, Traffic Citations, Property Inspections, Etc.		
HOURS SPENT ON SUPPORT OR PERIPHERAL ACTIVITIES	**389**	**51.14%**
The Hours Scheduled for required duties however are not criminal or non-criminal in nature and are supporting functions.		
Examples include: Report Writing, Court, Directed Patrol, Foot Patrol, On Duty Training, Transport of Paperwork to the Court, Evidence to the Crime Lab, Etc.		
TOTAL UNOBLIGATED PATROL HOURS	**256**	**33.68%**
The Hours of Scheduled Road Patrol left over that officers are not assigned to an activity or working on a complaint.		
Examples include: General Preventive Patrol, Building Security Checks, Etc. ***Note:*** *This also includes any break time the officers take during their shift.*		
TOTAL HOURS OBLIGATED TO DUTIES, COMPLAINTS, INVESTIGATIONS, ETC.	**505**	**66.32%**

It is recommended by the International Association of Chiefs of Police (IACP) that no more than 65% to 70% of an officers time on duty, be obligated to complaints, investigations, activities or assigned responsibilities. The rationale behind this is to assure that officers are available for emergencies without unreasonable delay and provide for preventive and traffic patrol duties.

Plainwell Department of Public Safety

Complaints/Activities for November 2017

ARRESTS

CUSTODIAL ARRESTS	**17**	*An individual taken into custody for a criminal offense and jailed for that offense.*
ARREST COUNTS	**26**	*Criminal complaints or cases cleared by the custodial arrest or issuance of a warrant(s).*

MEMORANDUM

211 N. Main Street
Plainwell, Michigan 49080
Phone: 269-685-6821
Fax: 269-685-7282

TO: Erik J. Wilson, City Manager

FROM: Brian Kelley, City Clerk/Treasurer

DATE: December 22, 2017

SUBJECT: Accounts Payable Register

ACTION RECOMMENDED: The City Council should consider approving the Invoice Approval Register and the Off-Cycle Payment Authorization reports, as presented.

The City Council reviews and approves the Accounts Payable total at each Council Meeting, which includes an Invoice Approval Register and an Off-Cycle Payment Authorization report. The Invoice Approval Register lists the regular billings issued to the city and consists, primarily, of paper checks. The Off-Cycle Payment Authorization report includes automated clearing house (ACH) payments, paper checks and electronic funds transfer (EFT) payments.

The attached documents cover the period from December 11 through 31, 2017 and includes the following breakdown:

Paper checks in regular bill listing:	$ 62,339.40
Other paper checks issued off-cycle:	130,639.46
ACH payments for property taxes:	154,079.20
ACH payments for city business:	50.00
EFT payments (auto-pay payments):	500.63
Total Accounts Payable	$347,608.69

RE: New rates for Airport Hangars & Tie Downs

Dear Tenant,

The City of Plainwell has implemented the annual increase in rates effective January 1, 2018 as follows:

T-Hangars 1 thru 12 - $93.43 per month
Service Building B - $436.00 per month (plus insurance premium)
Service Building C - $129.77 per month
Tie Down - $15.58 per month

The City will annually adjust the rental rates which will be reflected in the December invoice for the January usage at a minimum amount according to the Consumer Price Index of the Bureau of Labor Statistics, United States Department of Labor (CPI-U) for shelter rental. We would like to reiterate that all of the revenue raised at the airport stays within the airport budget to fund operations and improvements of the airport facility.

We thank you for your patronage and support of the Plainwell Municipal Airport. If you have any questions or concerns, please contact me at 269-685-6821.

Thank you,

Shirley Wilfinger,
Invoicing Clerk
City of Plainwell

cc: Erik Wilson, City Manager; Brian Kelley, Treasurer; Virgil Williams, Airport Manager

12/9/17

Hi Girls,

"Merry Christmas"

The city looks so festive and beautiful! Please send greetings to the right department for us. Today with the snow on the City Tree, it is Gorgeous!

Sincerely,

Nikki & Barry Paige

Reports & Communications:

A. DPW – Water Asset Management Plan:
Superintendent Updike has been working on a Water Asset Management Plan to send to Michigan Department of Environmental Quality.
Recommended action: Consider accepting the document and authorizing its filing with the DEQ.

B. City-Wide Flower Purchase
This is for the annual city-wide flower purchase that will be planted in May 2018.
Recommended action: Consider approving the purchase of flowers from Napp's Greenhouse in an amount not to exceed $4,500.

C. Prince Street Signal Improvements:
On December 19, 2017, bids were opened for improvements to the Prince Street Signal. A bid tabulation is included in the packet. This is related to the Sweetwaters Project.
Recommended action: Consider accepting the bid from J Ranck Electric for $17,050.00 for improvements to the Prince Street Signal.

D. Resolutions 18-01 through 18-05:
Council will consider adopting Resolutions 18-01 thru 18-05 for Ordinance enforcement officers, 2018 Council meetings, 2018 Employee Holiday dates, Street Flag dates and Street closures.
Recommended action: Consider adopting Resolutions 18-01 through 18-05 as presented.

Reminder of Upcoming Meetings

- TBD – Allegan County Board of Commissioners
- January 9, 2018 – Plainwell DDA/BRA/TIFA Board – 7.30am
- January 17, 2018 – Plainwell Planning Commission – 7:00pm (Public Hearing)
- January 8, 2018 – Plainwell City Council – 7:00pm

Non-Agenda Items / Materials Transmitted

- 2018 Airport Rental Rates
- Thank You card for Public Works Department
